INTRODUCTION

The eighth edition of the Wyoming Data Handbook is a collection of demographic, economic, and physical data concerning the State. Through the use of various state and federal agency publications, unpublished files, and other sources, the Division has provided the reader with the most current data available. Many of the tables and charts in this edition contain data showing historical series of five, ten or in some cases 20 years or better. Information which is no longer timely or relevant has been deleted, while new or supporting information has been added. Data sources, in most cases, have been referenced immediately following the respective table(s). The county summary sheets were not referenced due to the number of different sources utilized.

The Division of Research and Statistics is confident that this 1987 Handbook will be a useful reference tool and suffice in answering many questions concerning the Cowboy State. Response to previous editions of the Handbook and inquiries concerning the new edition have been very favorable. As always, the Division welcomes any comments and suggestions. Additional copies of the 1987 Wyoming Data Handbook may be obtained from the Department of Administration and Fiscal Control, Research and Statistics Division, Room 302 Emerson Building, Cheyenne, Wyoming 82002-0060.

WYOMING COST OF LIVING INDEX
(WCLI)

The WCLI annual inflation rates presented are based on changes in the prices of 139 items in the largest city in each county of Wyoming. Each price is compared to the price of that same item in the corresponding quarter of a year ago. The WCLI uses a similar weighting system to that used by the National Consumer Price Index (CPI) and adjusts all prices depending on population in each town and region. In the second quarter 1983 a change was made to a rental equivalency approach for home ownership to more closely resemble changes made by the CPI.
